

Experienced. Dependable. We Get the Job Done.

Since 1996, JCS Waterworks has grown from a trusted provider of general plumbing work to a full-service plumbing and heating contractor and supplier; serving commercial, industrial and residential customers.

JCS has the capacity to handle a wide scope of projects from plumbing and heating for home renovations to large-scale civil contracts. We are experts in water filtration and underground piping systems, and supply ongoing maintenance and repair services for residential and commercial customers. Whether the solution requires a custom design/build approach, engineering partnerships or tailored configurations, we have the ability to move quickly and get the job done, on time and within budget.

Over nearly two decades, JCS has developed strong relationships with engineers, contractors and suppliers, allowing us to partner with local companies and vendors on larger projects. We work as a sub-contractor, or provide full project management for complex industrial construction projects. Work can be done on an hourly or project rate; pricing can be labor only, or include materials and sub-contractors.

Our Team Becomes Your Team

The quality of our work reflects the experience and commitment of our people – many of our team members started with JCS as labourers and have gone on to become apprentices and journeymen. We are always up for a challenge, working with each customer to problem solve and find the best solutions to their needs.

Safety First

JCS team members are trained according to a fully developed safety program that qualifies them to work under diverse conditions. The company holds all required safety certifications. Bonding for large construction projects is available.

DIVERSE PROJECT CAPABILITIES

Commercial/Industrial/Residential

- Plumbing and Heating
- Water Well Servicing
- Water Filtration Systems
- Sewer Systems
- Heating Systems
- Underground Piping
- Water Well Pumps

Environmental Services

- Water Quality
- Water Sample Testing

Mining Exploration

- Pipe Installation (water, sanitary, storm)
- Waste/Water Treatment Plants
- Water Well Servicing
- Drill Water Support

Civil Contracting

Installation of waterworks, sewers, storm drains, foundations, landscaping, roadways, sidewalks, curbs, gutters and underground electrical and cable ducting.

Larger projects include health care facilities, schools, churches, and water and sewage treatment plants.

EQUIPMENT

JCS has all necessary equipment for the installation of complete water / sewer systems including pipe fusers, well pumps (hoist truck), skid steer, equipment trailers, etc. Through partnering relationships we have access to additional equipment such as excavators, dozers, graders, packers and dump trucks.

SAFETY CERTIFICATIONS

- Confined Spaces
- Fall Protection
- First Aid
- Bear Aware
- WHMIS
- COR Compliant Workplace Health and Safety Program

BC SAFETY AUTHORITY LICENSES

- Boiler & Pressure Contractor License
- Gas Contractor License
- Electrical Contractor License – FSR Class B
- Water Well Pump Installer

PROFESSIONAL CERTIFICATIONS

- Red Seal Certified Journeyman Plumbers
- Class "B" Gas fitters
- Certified Boiler Installer
- Polyethylene Pipe Fusion
- Qualified Pump Installer
- Environmental Operators Certification Program (EOCP)
- Certified Small Water System Operators
- Certified Small Wastewater System Operators
